SUSTAINABLE DEVELOPMENT

Students completing this program will examine strategies to efficiently and cleanly utilize our planet's natural resources to produce energy, food, and urban habitats. This program focuses on living and growing sustainably without degrading the environment so that future generations of all species may thrive--locally, nationally, and globally.

Student Learning Outcomes

1. Define and discuss the idea and practice of sustainability.
2. Analyze the economic, political, cultural, and ecological dimensions of globalization, including controversies associated with each.
3. Explain and evaluate current challenges to sustainability, including modern world social, environmental, and economic structures and crises.
4. Cultivate a sense of civic responsibility, including reflection on the student's own role in developing and nurturing sustainable communities.
5. Compare and evaluate the efficacy of national, regional, and international efforts to solve the problems associated with global issues.
